

Energy from every roof™

Roof-Integrated Solar

Low-profile, high-performance

GAF Energy solar, installed by a reliable GAF Master Elite® roofing contractor, is a great way to add clean, renewable energy to your roofing project.

Turn your roof into an energy-producing asset

Produce your own power. Lower your electric bill.¹ Decrease your reliance on the local utility company.

Over time, GAF Energy solar can pay for itself and your new roof by saving you money on your monthly electric bill.¹

¹ Savings will vary and are not guaranteed.

GAF Energy solar uses sunlight to produce electricity used to power your home. The more electricity you produce, the less you purchase from the utility company.

If your system generates more electricity than you need, energy can be sent back to the grid in exchange for credits to your bill that can be used to offset the cost of electricity that you buy from the utility.

Potential environmental impact of going solar

Choosing solar energy is equivalent to:

1,617 tree seedlings
planted

98 metric tons of
CO₂e avoided

227 barrels of oil
not burned

Average in GAF Energy services areas is based on a 4.32 kW solar system over 25 years. EPA Greenhouse Gas Equivalencies calculator numbers.

We've got you covered

When GAF Energy solar is integrated into a qualifying GAF roofing system installed by a GAF Master Elite® roofing contractor,³ the warranty covers both roof and solar.⁴ We also facilitate repair or replacement of other equipment included in your solar installation, such as the power electronics. Enjoy peace of mind with one industry-leading company standing behind your project.

GAF Warranty		Manufacturer's Warranty	
25 YEAR	Workmanship warranty on the roofing materials ⁴	25 YEAR	Equipment warranty on the power optimizers
25 YEAR	Equipment warranty on the solar panels ⁴	12 YEAR	Equipment warranty on the inverter

Unlike a traditional rack-mounted solar panel system, our elegant, low-profile solution attaches directly to the roof deck to provide protection against leaks. Utilizing roofing best practices and an overlapping seam to channel water, the system is water-shedding. **The solar is part of the roof.**

³ Contractors enrolled in GAF certification programs are not employees or agents of GAF, and GAF does not control or otherwise supervise these independent businesses. Contractors may receive benefits, such as loyalty rewards points and discounts on marketing tools from GAF for participating in the program.

⁴ See Golden Pledge® Limited Warranty and DecoTech® addendum for complete coverage and restrictions. For installations not eligible for the Golden Pledge® Limited Warranty and Decotech® Addendum, the Decotech® Limited Warranty applies. Visit gaf.com for copies of these limited warranties. Workmanship warranty term for 3-tab shingles is 20 years.

A powerful new roof

- Solar designed by roofing experts
- Water-shedding solar system is installed along with the roof
- Offers excellent protection for your home
- Dramatically simplifies the process of going solar

Get the benefit of federal tax credits

When you purchase your system, there's an opportunity to benefit from a federal tax credit, and now is the time to maximize its value. The sooner your project is installed, the more you stand to gain from available credits.

Contractors may receive benefits, such as loyalty rewards points and discounts on marketing tools from GAF for participating in the program.

Frequently Asked Questions

Q: Does GAF Energy solar produce as much electricity as a traditional rack-mounted system?

A: The GAF Energy system includes quality solar modules and inverters, producing the same amount of electricity as most other high-end solar systems.

Q: What maintenance is there with GAF Energy solar?

A: The GAF Energy system generally requires no maintenance. Though unnecessary, to maximize performance, you can safely hose off your system to clear dust or dirt.

Q: What happens to solar panels when it's cloudy or raining?

A: Solar panels still work even when the light is reflected or partially blocked. If the sun is up, your system will generate power.
